WHEELS.

Dear Freda,

I am having some work done on my wheels at Motor Wheel Services and thought that the following information would be useful to Club Members. They have apparently two chrome TF1700 wheels in stock at the moment and the price is £270.00 + VAT the pair.

David Reid, 53-44 Aberdeen.

EDITORIAL NOTE - I have been in touch with Gary Gardner at M.W.S. for information on the supply of wheels and he has confirmed that these are the last two in stock. However he is in touch with a company regarding the production of another batch of wheels and when he has the information he will be in touch with Mike Morley and then the information can be printed in Naylor News or a Newsletter.

The problem with chrome wheels is the spokes, and they would recommend the use of stainless steel spokes in future, as with chrome spokes these damage easily, causing the chrome to split.

Wheels can be rebuilt but it is difficult to cost the work without seeing the wheel. They would need to see the wheel to give an estimate what work needs doing.

Kevlar Greenstuff Brake Pads

EBC the brake component company manufacture brake pads called "Kevlar

Kevlar Greenstuff Brake Pads continued

Greenstuff' that virtually eliminates the black dust that normal pads produce keeping alloys and wire wheels cleaner for longer. They also claim that at least 20% increase in stopping power can be expected.

Price: around £25.00 per set

TF 1700 Replacement Front Dampers

Avo has now produced a suitable replacement for the front dampers and coil springs.

These are no more difficult to fit than the rear one's, although a glance through the workshop manual first would be useful. As there is a range of height adjustment it will be necessary to take a measurement from the top of the tyre and the underside of the wheel arch before lifting the car off the ground so that the new units can be set to the same height.

The damper adjustment can be set initially midway and then adjusted to your own choice. (either harder or softer)

When ordering, do not forget to mention The Naylor car Club to obtain the discount.
