YOUR LETTERS TO THE EDITOR YOUR LETTERS TO THE

*Dear Editor,*

*Being unhappy with the vulnerability of the reversing and rear fog light on our car, I decided that this winters project would be to find an alternative to the under bumper mounting of these items.*

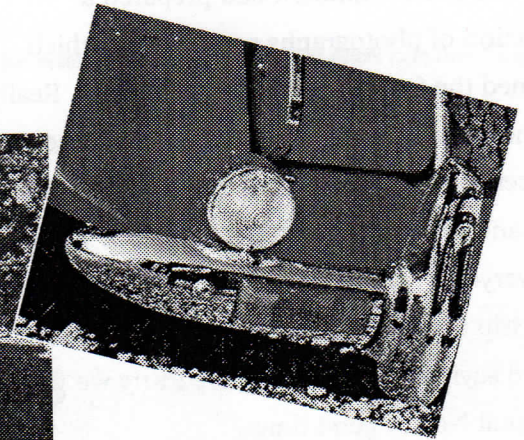

*My solution has been to mount the direction indicator lights within the rear bumper and use the flasher pods to house the round reversing and rear fog lights.*

*I obtained two front indicator light units from Hutsons and a red and white replacement lens from the Morgan Motor Company as these were used as rear fog and reversing lights on their cars until 1987 and are still stock items.*

*I enclose a photograph of the finished result.*

*Maynard Flint.*

*Dear Freda,*

*As I promised you, the following are the details regarding replacement gear boxes for an Ital 1700. The people who are making me a spare gearbox are:*

*Classic Gearbox Co  
(P Cavanagh)  
1, Stanley Avenue  
Marple, Cheshire  
SK6 6JJ.  
Tel 0161 427 5800*

*Ken Pearson, (161) Bradford.*
